Sea
$$M = AB \in \mathbb{R}^{n \times n}$$

So indice (i,i) es

 $M_{:} = (AB)_{::} = \sum_{j=1}^{p} A_{:j} B_{j}$

Luego, para is

 $(A \circ B^{T})_{:j} = A_{:j} \cdot B^{T}_{:j} = A_{:j} B_{j}$

Sumanda solve j

 $P_{:} = \sum_{j=1}^{p} (A \circ B^{T})_{:j} = \sum_{j=1}^{p} A_{:j} B_{j}$

Por le Tanto

 $V_{:} = \sum_{j=1}^{p} (A \circ B^{T}) = \sum_{j=1}^{p} A \circ B^{T}$

. diag $(AB) = \sum_{i=1}^{p} A \circ B^{T}$
